

OCRYL FOR EYES

- CLEANS AWAY CRUSTS AND MUCUS
- HELPS TO COMBAT TEAR STAINING

OCRYL FOR EYES

HELPS TO COMBAT TEAR STAINING

Tear staining can be unsightly when noticeable on pale fur and can be secondary to ocular conditions causing excessive tearing* or due to the structure of the face

- ✓ The combination of ingredients in Ocryl helps reduce stains and keep them at bay
- ✓ Consider starting use in puppies and kittens in susceptible breeds or pets with light coloured fur and make it part of your routine hygiene regimen

.....

Attack phase for current discolouration:

Apply 1-2 times per day using a cotton swab

- ✓ Results expected within 10-14 days of use

.....

Maintenance/prevention phase:

Apply 1-2 times per week

UNIQUE
COMBINATION
OF
INGREDIENTS

*it is advisable to investigate and treat underlying causes of excessive tearing where possible

OCRYL FOR CATS AND DOGS

Gentle and effective, helping to keep your pet's eyes clean and clear.

“ After many years of staining under Molly's eyes, I had tried many things but nothing really worked.

The Head Nurse at my local vet practice asked me to trial a new eye cleaner, Ocryl. I was adamant that Ocryl would not work but I agreed to try the product. To my amazement in just three days there was a significant difference, I was delighted!

I can recommend this product and assure you it really does work....tried and tested by myself and Molly, a big "paws" up from us!!
Julia Sandford, owner of 7 rescue dogs

BEFORE

AFTER

“ Heidi, my 19-month-old Bichon, had always had problems with tear staining and I had tried various techniques and eyecleaners on those stubborn, brown stains. Nothing worked until I tried Ocryl; after 2 weeks of use, Heidi's face was markedly whiter, the staining resolved. Now I use Ocryl on all my Bichons to prevent tear stains in the first place! ”

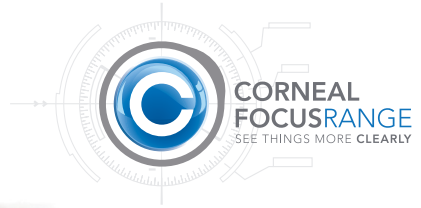

Chrissie Osborne,
owner of 12 Bichon Frises

OCRYL FOR EYES

CLEAN THE EYE

- ✓ **Gentle solution** which helps to soften crusts to aid removal
- ✓ Can be used to **flush and clean the eye** and the surrounding area
- ✓ Can be used to **prepare the eye** for other drops
- ✓ **Removes debris** that can otherwise act as a site for microbial multiplication

APPLICATION

Apply directly or soak a cotton swab and press onto the area to soak and wipe away crusts

Use as necessary

Ocryl is available in bottles of 135ml. Ocryl contains methylene blue, benzalkonium chloride, boric acid, sodium borate, and rose extract.

Use medicines responsibly. www.noah.co.uk/responsible.
