

PET DANGERS!

BEWARE OF THE DANGERS HIDDEN IN PLAIN SIGHT

DON'T LET YOUR PET BE A VICTIM

There are many items in and around the home that can be highly toxic and deadly to pets - even in very small quantities.

You may be surprised at some of the pet poisons displayed here, as they are often common household items hiding in plain sight that you may not have considered dangerous.

Please take note and make sure your pet does not get access to any of the following substances.

plants and flowers

Antifreeze

WHAT SHOULD I DO IF I THINK MY PET HAS BEEN POISONED?

S.P.E.E.D is key, follow the acronym below and act immediately. NEVER just wait and see as there may only be a small window in which treatment can be given to help your pet - and often this may be before any symptoms have started showing.

In many cases, the sooner treatment is given the higher the chance of a successful outcome for your pet.

If your dog or cat eats poison, **S.P.E.E.D.** is of the essence!

- S** Stop the pet from eating any more suspected poison
- P** Phone the vets
- E** Emergency appointment
- E** Evidence - Bring labels/samples/vomit (in a safe manner)
- D** Don't delay!
